PROFESSIONAL SUMMARY

Engineering graduate with hands-on experience in software development gained through self-learning, internships, and projects. Worked with web applications, APIs, databases, and basic cloud environments. Familiar with modern development tools and AI-assisted workflows, and open to learning and applying new technologies based on role requirements.

TECHNICAL SKILLS

- | | |
|------------|---|
| Languages | : C/C++, JavaScript, HTML, CSS |
| Frameworks | : React.js, Node.js, Express.js |
| Libraries | : Redux Toolkit, TanStack Query, Tailwind CSS, DaisyUI, Zustand |
| Databases | : MongoDB, MySQL |
| Dev Tools | : Visual Studio Code, Git, Vite, GitHub Actions, Vercel, AWS EC2, Nginx, Firebase |
| Design | : Figma, Anima (AI), Ready AI |

EXPERIENCE

- | | |
|---|---|
| Full Stack Developer Intern
<i>Luminar Technolab</i> | Oct 2024 – May 2025
<i>Onsite – Kochi, Kerala</i> |
| <ul style="list-style-type: none">Gained hands-on experience in building web applications using React.js, Node.js, Express.js, and MongoDBDeveloped frontend components and integrated them with backend REST APIsWorked on authentication, CRUD operations, and application flow across frontend and backendCollaborated on real-world projects to strengthen debugging, code quality, and problem-solving skills | |
| Web Development Intern
<i>Browsap Solutions</i> | Feb 2024 – Jul 2024
<i>Remote – Kannur, Kerala</i> |
| <ul style="list-style-type: none">Worked with developers on live projects to understand real-world development workflowsAssisted in website design, maintenance, and content updatesLearned basics of API usage, documentation, and version controlGained exposure to collaborative development and client-oriented requirements | |

EDUCATION

- | | |
|--|---|
| Srinivas Institute of Technology
<i>Bachelor of Engineering in Electronics and Communication Engineering</i> | Mangaluru, Karnataka
Aug 2018 – Jul 2022 |
| Chavassery Higher Secondary School
<i>Pre-University (Computer Science)</i> | Kannur, Kerala
Jun 2016 – Mar 2018 |

PROJECTS

- | | | |
|---|--|-----------------------------|
| Full Stack Matchmaking Platform | <i>React.js, Node.js, Express.js, MongoDB, Socket.IO, AWS EC2</i> | Source Code |
| <ul style="list-style-type: none">Developed a full-stack matchmaking platform with user profiles, feed, and request/accept workflowsImplemented real-time chat and notifications using Socket.IOIntegrated Razorpay for subscriptions and premium featuresDeployed the application on AWS EC2 with Nginx and production configuration | | |
| Chat & Video Calling Application | <i>React.js, Express.js, MongoDB, Tailwind CSS, TanStack Query</i> | Source Code |
| <ul style="list-style-type: none">Built a real-time chat application with typing indicators, reactions, and notificationsImplemented one-to-one and group video calls with screen sharing and recordingSecured the application using JWT authentication and protected routesManaged global state using Zustand and handled server data with TanStack Query | | |
